

Ordinary differential equations: from calculus to dynamical systems / by V.W. Noonburg

ISBN: 9781939512048

Table of contents

Preface

Sample Course Outline

1. Introduction to Differential Equations
2. First-order Differential Equations
3. Second-order Differential Equations
4. Linear Systems of First-order Differential Equations
5. Geometry of Autonomous Systems
6. Laplace Transforms
- A. Answers to Odd-numbered Exercises
- B. Derivative and Integral Formulas
- C. Cofactor Method for Determinants
- D. Cramer's Rule for Solving Systems of Linear Equations
- E. The Wronskian
- F. Table of Laplace Transforms

Index
