

**Biomaterials: a basic introduction** / Qizhi Chen, George Thouas

**ISBN 9781482227697**

Table of Contents

**Part I**

Biomaterials Science

Biomaterials Science and Engineering

Learning Objectives

Materials Science and Engineering

Multilevels of Structure and Categorization of Materials

Four Categories of Materials

Definitions of Biomaterials, Biomedical Materials, and Biological Materials

Biocompatibility

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Bibliography

Toxicity and Corrosion

Learning Objectives

Elements in the Body

Biological Roles and Toxicities of Trace Elements

Selection of Metallic Elements in Medical-Grade Alloys

Corrosion of Metals

Environment inside the Body

Minimization of Toxicity of Metal Implants

Chapter Highlights

Laboratory Practice 1

Simple Questions in Class

Problems and Exercises

Advanced Topic: Biological Roles of Alloying Elements

Bibliography

Mechanical Properties of Biomaterials

Learning Objectives

Role of Implant Biomaterials

Mechanical Properties of General Importance

Hardness

Elasticity: Resilience and Stretchability

Mechanical Properties Terms Used in the Medical Community

Failure

Essential Mechanical Properties of Orthopedic Implant Biomaterials

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Bibliography

Metallic Biomaterials in Orthopedic Implants

Learning Objectives

Development of Metallic Biomaterials

Stainless Steels

Cobalt-Based Alloys

Titanium Alloys

Comparison of Stainless Steels, Cobalt, and Titanium Alloys

Summary and Remarks

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Bibliography

Metallic Biomaterials: Miscellaneous Others

Learning Objectives

Dental Materials

NiTi Shape-Memory Alloys

Other Clinically Applied Metallic Materials

New Metallic Materials: Magnesium Alloys

Chapter Highlights

Laboratory Practice 2

Simple Questions in Class

Problems and Exercises

Bibliography

Bioinert Ceramics

Learning Objectives

Overview of Bioceramics

Inert Bioceramics: Al<sub>2</sub>O<sub>3</sub>

Inert Bioceramics: ZrO<sub>2</sub>

Two Types of Joints

Summary and Remarks on Al<sub>2</sub>O<sub>3</sub> and ZrO<sub>2</sub>

Dental Ceramics

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Advanced Topic: Total Joint Replacement

Bibliography

Bioactive and Bioresorbable Ceramics

Learning Objectives

Overview of Surface Bioactive and Bulk Degradable Ceramics

Calcium Phosphates and Hydroxyapatite

Bioactive Glasses

Bioactive Glass-Ceramics

Bone-Bonding Mechanisms

Biodegradable Ceramics

Chapter Highlights

Laboratory Practice 3

Simple Questions in Class

Problems and Exercises

Advanced Topic: Bioceramic Scaffolds for Bone Tissue Engineering

Bibliography

Polymeric Biomaterials: Fundamentals

Learning Objectives

Basic Concepts on Polymers

Overview of Polymeric Biomaterials

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Advanced Topic: Polymers and Polymer Scaffolds for Soft Tissue Engineering

Bibliography

Bioinert Polymers

Learning Objectives

Polyolefin

Poly(Ethylene Terephthalate)

Acrylate Polymer

Fluorocarbon Polymers

Silicone

Polyurethane

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Advanced Topic: Properties and Applications of Polyurethane as Biomaterials

Bibliography

Bioresorbable Polymers

Learning Objectives

Biodegradation of Polymers

Polyesters: PGA, PLA, and PCL

Polyesters: PHA

Elastomeric Polyester: Poly(Polyol Sebacate)

Polyether: Poly(Ethylene Glycol)

Polyamide

Surface-Erodible Polymers

Biological Polymers

Chapter Highlights

Simple Questions in Class

Problems and Exercises

Laboratory Practice 4

Advanced Topic: Natural Polymers: Resilin, Silk, and Gluten

Bibliography

Composite Biomaterials

Learning Objectives

Overview of Composites

Natural Composites: Bone

Dental Composites

Artificial Bone

Chapter Highlights

Laboratory Practice 5

Simple Questions in Class

Problems and Exercises

Advanced Topic: Development of Artificial Bone: Composites and Scaffolds

Bibliography

## **Part II**

Medical Science

Medicine and Medical Science

Learning Objectives

Medicine and Medical Science

Medical Science versus Materials Science

Learning Goals of Part II

Chapter Highlights

Activity

Bibliography

Image Links

Simple Questions in Class

Problems and Exercises

Human Anatomy And Diseases I: Integumentary, Skeletal, Muscular, Nervous, and Endocrine Systems

Learning Objectives

Integumentary System

Skeletal System

Muscular System

Nervous System

Endocrine System

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Advanced Topic: Biomaterial Challenges in Bone Tissue Engineering

Bibliography

Human Anatomy And Diseases II: Cardiovascular System

Learning Objectives

Anatomy and Functions of the Cardiovascular System

Cardiovascular Disease

Cardiac Performance: P–V Loop

Current Therapies for Heart Disease

Alternative Treatments and Application of Biomaterials

Artificial Blood Vessels

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Bibliography

Human Anatomy And Diseases III: Respiratory, Lymphatic, Digestive, Urinary, and

Reproductive Systems

Learning Objectives

Respiratory System

Lymphatic System

Digestive System

Urinary System

Reproductive System

Chapter Highlights

Activities

Simple Questions in Class

Problems and Exercises

Bibliography

Cells and Biomolecules

Learning Objectives

Introduction

Cell Biochemistry and Biosynthesis

Cell Structure

Transport across Plasma Membranes

Cell Proliferation

Cell Differentiation and Stem Cells

Chapter Highlights

Activities

Advanced Topic: Cell Therapy to Treat Cardiac Disease

Strategies to Address Immune Rejection in Cells

Summary of Cell-Based Therapies and Their Limitations

Simple Questions in Class

Problems and Exercises

Bibliography

Histology and Tissue Properties I: Epithelial, Neuronal, and Muscle Tissue

Learning Objectives

Introduction

Epithelium

Muscular Tissue

Nervous Tissue

Chapter Highlights

Activities

Advanced Topic: Properties of Proteins in Mammalian Tissues

Simple Questions in Class

Problems and Exercises

Bibliography

Histology and Tissue Properties II: Connective Tissues

Learning Objectives

Overview of Connective Tissues

Types of Connective Tissue

Connective Tissue Proper (Skin, Tendon, Ligament)

Mechanical Properties of Structural Proteins

Cartilage

Bone

Chapter Highlights

Laboratory Practice 6

Simple Questions in Class

Problems and Exercises

Bibliography

Immune System and Body Responses to Biomaterials

Learning Objectives

Immune System

Tissue Response to Injuries

Body Response to Implants

Chapter Highlights

Activities

Simple Questions in Class  
Problems and Exercises  
Bibliography  
Evaluation of Biomaterials  
Learning Objectives  
Overview of Biomaterials Evaluation  
Standards  
Toxicological Evaluation  
Cytotoxicity Testing  
Evaluation in Animals  
Chapter Highlights  
Laboratory Practice 7  
Case Study: Evaluation of Heart Patch in Rats  
Simple Questions in Class  
Problems and Exercises  
Bibliography  
Regulation of Medical Devices  
Learning Objectives  
Regulations versus Standards  
Medical Devices  
Preclinical Testing  
Clinical Trials  
Development of Medical Devices and Possible Career Opportunities  
Chapter Highlights  
Activities  
Simple Questions in Class  
Problems and Exercises  
  
Bibliography  
Index
