

**Replacement of renal function by dialysis** / Jacobs,C., ed.- Kjellstrand,C.M., ed.- Koch,K.M., ed.- Winchester,J.F., [editor-in-chief]. 4th.ed.

**ISBN: 9789401741781**

**Volume 1:**

I: Pathophysiology of the uremic syndrome. Principles and biophysics of dialysis.

1. Uremic syndrome; R. Vanholder, et al.
2. Principles and biophysics of dialysis; J.A. Sargent, F.A. Gotch.
3. Membranes for dialysis; C. Colton, M.J. Lysaght.
4. Biophysics of UF and HF; L.W. Henderson.
5. Peritoneal anatomy and physiology during PD; R.T. Krediet.
6. Biocompatibility - principles; R.M. Hakim, J. Himmelfarb.

II: Technology of dialysis and associated methods.

7. Hemodialysers and associated devices; N.A. Hoenich, et al.
8. Water preparation; B.J. Canaud, C.M. Mion.
9. Hemodialysis fluid composition; C. Ronco, et al.
10. Hemodialysis access: A: Temporary; P.R. Uldall. B: Permanent; C.E. Butler, N. Tilney.
11. Malfunctioning hemodialysis access: diagnosis and percutaneous treatment; D. Vorwerk, et al.
12. Thrombogenesis and anticoagulation in patients undergoing chronic hemodialysis; G. Viganò, et al.
13. HD machines and monitors; H.D. Polaschegg, N.W. Levin.
14. UF and HF practices; E. Quellhorst.
15. Continuous arteriovenous hemofiltration and related therapies; A.A. Kaplan.
16. Pros and cons of short high efficiency and high flux dialysis; R. Barth.
17. Dialyser reuse-techniques and controversy; A.M. Miles, E.A. Friedman.
18. Extracorporeal blood purification techniques: plasmapheresis and hemoperfusion; J.F. Winchester, et al.
19. Peritoneal dialysis access, placement, connectors; B. Piraino.
20. Solutions for PD; M. Feriani, et al.
21. Automated PD; J. Diaz-Buxo.
22. Continuous PD; C.M. Mion.

III: Quantification and prescription of dialysis.

23. Indications for long term results and limitations of PD; D.N. Churchill.
24. Quantification and prescription. General principles; P. Blake, J. Daugirdas. IV: Complications of dialysis.
25. Peritoneal infections, hernias and related complications; R. Gokal.
26. Acute complications of hemodialysis and their prevention and treatment; S.K. Mujais, et al.
27. Pyrogenic reactions; G. Lonneman, K.M. Koch.
28. Biocompatibility -- Clinical aspects; H. Lemke, et al.

**Volume 2:**

V: Pharmacological considerations.

29. Drug dosage in dialysis patients; Th.A. Golper, et al.

VI: Special clinical situations.

30. Acute renal failure; C.M. Kjellstrand, B.P. Teehan.
31. Renal replacement therapy in children; R. Donckerwolcke, et al.
32. Dialysis in the elderly; E. Grapsa, D.G. Oreopoulos.
33. Pregnancies in women on renal replacement therapy; A.J. Wing, J.H.H. Ehrich.
34. The dialysis patient and transplantation; U. Frei.
35. Dialytic management of diabetic uremic patients; E. Friedman, A.V. Miles.
36. Anesthesia; B.L. Kasiske.

VII: Organ system and metabolic complications in chronic dialysis.

37. Blood pressure control chronic hemodialysis patients
38. Organ and metabolic complications: cardiac

39. Organ and metabolic complications: lipids/atherosclerosis
40. Organ and metabolic complications: acid-base
41. Pulmonary aspects of dialysis patients
42. Gastrointestinal complications in dialysis patients
43. Hematological problems of renal failure
44. Organ and metabolic
45. Immunological and chronic inflammatory abnormalities in end stage renal disease
46. Host defenses and infectious complications in maintenance hemodialysis patients
47. Viral infections in dialysis patients
47. Part A: human immunodeficiency virus infections in dialysis patients
47. Part B: Dialysis associated hepatitis
48. Renal osteodystrophy
49. Organ and metabolic complications-abnormal endocrine function in chronic renal failure
50. Neurological aspects of dialysis patients
51. Organ and metabolic complications. Trace elements
52. Malnutrition and dialysis
53. Organ and metabolic complications: B2-microglobulin amyloidosis

#### VIII: Organization and results of chronic dialysis

54. Options in renal replacement therapy
55. Part A: hemodialysis-clinical management and follow up
55. Part B: clinical management and follow up of PD patients
56. Home hemodialysis and satellite hemodialysis
57. Long-term survival in dialysis patients: a demographic overview
58. Part A: the work of the registries for renal disease and renal failure: a critical review
58. Part B: outcomes with ESRD therapy: a critical overview from the United States
58. Part C: registry report of dialysis therapy in Japan
58. Part D: structure and outcome measurements-EDTA-ERA registry
58. Part E: outcomes-critical overview: Australian registry
58. Part F: renal replacement therapy in Canada 1981-1992
59. Prevention of chronic renal failure
60. Dialysis in developing countries
61. Planning of dialysis for disasters
62. Part A: psychiatric aspects of the dialysis patients
62. Part B: quality of life of the dialysis patient
63. Stopping dialysis: practice and cultural, religious and legal aspects.
