

Fundamentals of statistical signal processing: volume I: estimation theory / Steven Kay.

ISBN 10: 0133457117

ISBN 13: 9780133457117

Summary:

1. Introduction.
 2. Minimum Variance Unbiased Estimation.
 3. Cramer-Rao Lower Bound.
 4. Linear Models.
 5. General Minimum Variance Unbiased Estimation.
 6. Best Linear Unbiased Estimators.
 7. Maximum Likelihood Estimation.
 8. Least Squares.
 9. Method of Moments.
 10. The Bayesian Philosophy.
 11. General Bayesian Estimators.
 12. Linear Bayesian Estimators.
 13. Kalman Filters.
 14. Summary of Estimators.
 15. Extension for Complex Data and Parameters.
- Appendix: Review of Important Concepts.
- Glossary of Symbols and Abbreviations.
