Preface	v
1. Fractal Measures	1
1.1 Measure Theory	1
1.2 Hausdorff and Packing Measures	13
1.3 Vitali Theorems	21
1.4 Other Local Fractal Measures	28
1.5 Geometry of Fractals	41
1.6* Ultrametric Spaces	54
1.7* Comparable Net Measures	58
1.8* Remarks	63
2. Integrals	69
2.1 Product Measures	69
2.2 Integrals	77
2.3 Radon–Nikodým Theorem	88
2.4 Measures as Linear Functionals	93
2.5 Spaces of Measures	100
2.6* Remarks	110
3. Integrals and Fractals	113
3.1* Topological and Fractal Dimension	113
3.2 Potential Theory	115
3.3 Fractal Measures	123
3.4 Self-Affine Graphs	135
3.5* Graph Self-Similar Measures	146
3.6* Remarks	148
4. Probability	153
4.1 Events	153
4.2 Random Variables	158
4.3 Dependence	175
4.4 Limit Theorems	195
4.5* Remarks	201

* Asterisks indicate optional sections.

5. Probability and Fractals	203
5.1 The Chaos Game	203
5.2 Dimension of Self-Similar Measures	208
5.3 Random Cantor Sets	213
5.4 Statistical Self-Similarity	220
5.5 Statistically Self-Affine Graphs	230
5.6 Brownian Motion	249
5.7* A Multifractal Decomposition	257
5.8* Remarks	262
References	267
Notation	279
Index	281
