

CONTENTS

1.	WHAT IS MODELING	1
1.1.	MODELS AND REALITY	1
1.2.	PROPERTIES OF MODELS	2
1.3.	BUILDING A MODEL	6
1.4.	AN EXAMPLE	8
1.5.	ANOTHER EXAMPLE	10
	Problems	12
1.6.	WHY STUDY MODELING?	14
PART 1. ELEMENTARY METHODS		17
2.	ARGUMENTS FROM SCALE	19
2.1.	EFFECTS OF SIZE	19
	Cost of Packaging	19
	Speed of Racing Shells	22
	Size Effects in Animals	26
	Problems	29
2.2.	DIMENSIONAL ANALYSIS	34
	Theoretical Background	35
	The Period of a Perfect Pendulum	37
	Scale Models of Structures	38
	Problems	40
3.	GRAPHICAL METHODS	44
3.1.	USING GRAPHS IN MODELING	44
3.2.	COMPARATIVE STATICS	45
	The Nuclear Missile Arms Race	45
	Biogeography: Diversity of Species on Islands	49
	Theory of the Firm	52
	Problems	56

3.3.	STABILITY QUESTIONS	57	
	Cobweb Models in Economics	57	
	Small Group Dynamics	60	
	Problems	63	
4.	BASIC OPTIMIZATION		66
4.1.	OPTIMIZATION BY DIFFERENTIATION	66	
	Maintaining Inventories	66	
	Geometry of Blood vessels	71	
	Fighting Forest Fires	73	
	Problems	76	
4.2.	GRAPHICAL METHODS	81	
	A Bartering Model	81	
	Changing Environment and Optimal Phenotype	84	
	Problems	88	
5.	BASIC PROBABILITY		91
5.1.	ANALYTIC MODELS	91	
	Sex Preference and Sex Ratio	91	
	Making Simple Choices	94	
	Problems	98	
5.2.	MONTE CARLO SIMULATION	103	
	A Doctor's Waiting Room	106	
	Sediment Volume	108	
	Stream Networks	110	
	Problems	115	
	A Table of 3000 Random Digits	118	
6.	POTPOURRI		121
	Desert Lizards and Radiant Energy	121	
	Are Fair Election Procedures Possible?	124	
	Impaired Carbon Dioxide Elimination	127	
	Problems	130	
PART 2.	MORE ADVANCED METHODS		137
7.	APPROACHES TO DIFFERENTIAL EQUATIONS		139
7.1.	GENERAL DISCUSSION	139	
7.2.	LIMITATIONS OF ANALYTIC SOLUTIONS	140	

7.3.	ALTERNATIVE APPROACHES	140	
7.4.	TOPICS NOT DISCUSSED	142	
8.	QUANTITATIVE DIFFERENTIAL EQUATIONS		144
8.1.	ANALYTICAL METHODS	144	
	Pollution of the Great Lakes	144	
	The Left Turn Squeeze	148	
	Long Chain Polymers	152	
	Problems	155	
8.2.	NUMERICAL METHODS	160	
	Towing a Water Skier	160	
	A Ballistics Problem	164	
	Problems	165	
	The Heun Method	171	
9.	LOCAL STABILITY THEORY		173
9.1.	AUTONOMOUS SYSTEMS	173	
9.2.	DIFFERENTIAL EQUATIONS	175	
	Theoretical Background	175	
	Frictional Damping of a Pendulum	177	
	Species Interaction and Population Size	180	
	Keynesian Economics	184	
	More Complicated Situations	187	
	Problems	188	
9.3.	DIFFERENTIAL-DIFFERENCE EQUATIONS	193	
	The Dynamics of Car Following	193	
	Problems	198	
9.4.	COMMENTS ON GLOBAL METHODS	199	
	Problem	201	
10.	MORE PROBABILITY		202
	Radioactive Decay	202	
	Optimal facility Location	204	
	Distribution of Particle Sizes	207	
	Problems	212	
APPENDIX.	SOME PROBABILISTIC BACKGROUND		217
A.1.	THE NOTION OF PROBABILITY	217	
A.2.	RANDOM VARIABLES	220	
A.3.	BERNOULLI TRIALS	224	

100-10171-101
 100-10171-101
 100-10171-101

x CONTENTS

A.4.	INFINITE EVENT SETS	225
A.5.	THE NORMAL DISTRIBUTION	230
A.6.	GENERATING RANDOM NUMBERS	232
A.7.	LEAST SQUARES	234
A.8.	THE POISSON AND EXPONENTIAL DISTRIBUTIONS	237
