

Signal Processing First Chapters

- 1: Introduction
 - Welcome
 - Getting Started**
 - Help
 - Authors
 - Prentice Hall
 - License
 - Feedback
 - MATLAB Index
 - Table of Contents
 - Index
- 2: Sinusoids
- 3: Spectrum Representation
- 4: Sampling and Aliasing
- 5: FIR Filters
- 6: Frequency Response of FIR Filters
- 7: Z-Transform
- 8: IIR Filters
- 9: Continuous-Time Signals and LTI Systems
- 10: Frequency Response
- 11: Continuous-Time Fourier Transform
- 12: Filtering, Modulation, and Sampling
- 13: Computing the Spectrum
- A: Complex Numbers

WELCOME

Welcome to the CD-ROM portion of *Signal Processing First*. Please read through this brief introduction before proceeding to the rest of the CD-ROM.

The CD-ROM contains the following information for each chapter:

- Demos - QuickTime movies, MATLAB-based demos, sound files, etc. that help reinforce the concepts introduced in the text.
- Labs - Over 20 MATLAB based laboratory exercises for in-depth study of concepts and ideas introduced in the text.
- Exercises - Solutions to the exercises in the text.
- Examples - Examples given in the text.
- Homework - A large collection of homework problems, most with solutions. This material is very useful as a study aid.

The information on the CD-ROM is presented in a number of different formats. You can choose to view just the demos (sorted by chapter), just the labs (also sorted by chapter), or dive straight into the archives of homework problems. Probably the most useful way to work your way through the CD-ROM, however, is to use the tree at the left.

Visit the [Getting Started](#) link to be sure you have all the applications (QuickTime[®], Acrobat Reader[®], etc.) that you need.
