The World of the Cell

Welcome

Welcome to The Cell Place CD, a media learning tool from Benjamin Cummings. This CD is designed to help students explore in depth a variety of topics in cell biology. To begin, choose a chapter from the pull-down menu above and then select a feature on the left.

You will find an abundance of resources on this site including:

- **Microscopy videos** of live cells so you can watch biological processes in action.
- **Activities** such as interactive tutorials, simulations, animations, and step-by-step problems. Explore current topics in cell biology like cell structure, regulation of gene expression, and macromolecules to name a few.
- Practice **quizzes** with questions on each chapter. Each quiz contains 20 multiple choice questions with feedback for each answer.
- Lists of **key terms** which highlight key ideas in each chapter. Please note that the key terms for the appendix are listed under chapter 24.
- **Web links** specially selected to make it easy to further your study of cell biology and connect to outside resources from the internet.
- **Flashcards** organized by chapter to help you master the vocabulary presented in each chapter.
- A **glossary** providing definitions of all key terms.
- **Research Navigator™**, which provides authoritative research tools and sources for Cell Biology. In addition to guidance on the research process, academic writing, and documentation styles, Research Navigator offers several exclusive databases of credible and reliable source content to get your research process started.
